Achievements

Earned a [Silver Stevie Award](#) in the Best Use of Technology in Customer Service – Computer Services and Computer Software category for creating a unique business intelligence workflow management application at MediaTemple / GoDaddy.

Helped develop a unique social media analytics platform used by major brands such as CNN, Fox, NFL & Nike which ultimately helped the company founders of Delmondo achieve a [successful exit](#) with Conviva.

Extended legacy HIPAA-compliant software end-of-life expectancy by 2+ years by providing features and bug resolutions for 2 apps used by mental health clinicians and their patients.

Experience

Senior Software Engineer

Crystal Bay Software

San Francisco, CA (*remote*)

Jan 2020 - Apr 2023

Worked with the founder to maintain a HIPAA-compliant, custom EHR software solution for a major California-based mental health facility.

Utilized a wide spectrum of Google Cloud Platform technologies, scaling techniques and CI/CD build processes in order to maintain a smooth experience for doctors and patients utilizing the 2 apps.

Software Engineer

Conviva Ltd.

Foster City, CA (*remote*)

Dec 2018 - Jan 2020

An integral part of an engineering team that transitioned the Delmondo platform into the Conviva platform.

Worked with various stakeholders from the new company's Beijing-based engineering team in order to knowledge-dump and document important application architecture information. This required detailed documentation, effective communication and early working hours.

Full Stack Software Developer

Delmondo Inc.

New York, NY (*remote*)

Dec 2016 - Dec 2018

An integral part of an engineering team which developed a cutting-edge social media analytics platform for major global brands.

Designed several dashboard views for metrics relating to Facebook, Instagram, Vine, Snapchat and Twitter. Implemented dozens of complex charts to cleanly represent data using software such as HighCharts.js.

Helped resolve hundreds of bugs many of which were complex and required delicate traversing through external APIs such as Facebook's Graph API.

Implemented dozens of key features in a fast-paced Agile environment in a tight-knit team of 3.

Assisted with task priority planning, participated in sprint retrospectives and collaborated with the CTO and CEO to help them reach their goal of a successful exit.

Full Stack Software Developer

MediaTemple Inc.

Culver City, CA (*hybrid*)

Jan 2010 - Jul 2016

Sole responsibility for the continued expansion and maintenance of my award-winning business intelligence web application, 'The Matrix'. Hyper-focused in helping implement new business intelligence stored procedures, optimizing queries on growing datasets and adding more fun gamification components.
