Summary

An empathetic, motivated & skilled full stack software engineer with 14+ years of professional web application development experience. Passionate about user experience, process efficiencies and making a positive change in the world. Strong leadership, listening, writing and speaking skills. Seeking principal, lead or senior software engineering roles.

Achievements

Earned a [Silver Stevie Award](#) in the *Best Use of Technology in Customer Service – Computer Services and Computer Software* category for creating a business intelligence workflow management application at MediaTemple / GoDaddy.

Helped develop a unique social media analytics platform used by major brands such as CNN, Fox, NFL & Nike which ultimately helped the company founders of Delmondo achieve a [successful exit](#) with Conviva.

Extended legacy HIPAA-compliant software end-of-life expectancy by 2+ years by providing features and bug resolutions for 2 apps used by mental health clinicians and their patients.

Experience

Senior Software Engineer

Crystal Bay Software

San Francisco, CA (remote)

Jan 2020 - Apr 2023

Worked in a tiny startup to maintain HIPAA-compliant, custom EHR software built for a major California mental health facility. Resolved hundreds of bugs, implemented hundreds of features, enhanced the CI/CD build process, identified & implemented scalability measures and more for 2 applications in use daily by hundreds of doctors and patients.

Software Engineer

Conviva Ltd.

Foster City, CA (remote)

Dec 2018 - Jan 2020

Part of an agile engineering team which continued development and transitioned the Delmondo platform into the Conviva platform.. Collaborated with various Beijing-based engineering team stakeholders to share knowledge and document important application architecture information.

Full Stack Software Developer

Delmondo Inc.

New York, NY (remote)

Dec 2016 - Dec 2018

Part of an agile engineering team which developed a cutting-edge social media analytics platform for major global. Implemented 75+ features, resolved 100+ bugs and ultimately helped the owners successful exit.

Business Systems Engineer

MediaTemple Inc.

Culver City, CA (hybrid)

Jan 2010 - Jul 2016

Responsible for continued development and maintenance of my award-winning business intelligence web application used by 80+ support representatives and managers which provided employee performance insights, gamification elements and external data collection.

Skills

React.js, Next.js, Typescript, Javascript, GCP, (Run, App Engine, Functions, Build, IAM, Firestore, Scheduler, Storage, Tasks, SQL, Memorystore, Monitoring, Identity Platform), HTML, CSS, DNS, SDLC, REST APIs, MySQL, PostgreSQL, Query Optimization, Serverless & Microservice Architecture, Troubleshooting, CI/CD, SEO, State Management (Redux, Zustand, Recoil), Node.js, Express.js, Redis, Websockets, Socket.io, Cloudflare Tools, Agile, Git, Test Coverage, Unit Testing, Jest, Mocha, React-Testing-Library, Eslint, Prettier, Three.js, R3F, JWT, CSRF, YAML, SSR, Firebase, Highcharts.js & more.
